## What is ritePen?

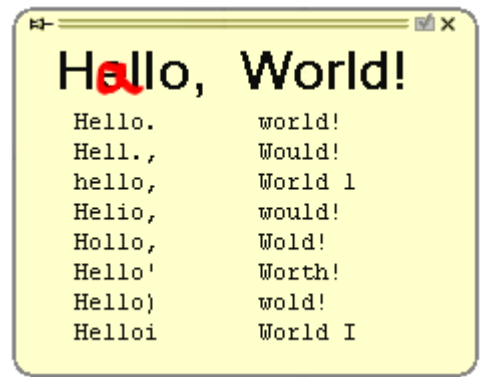

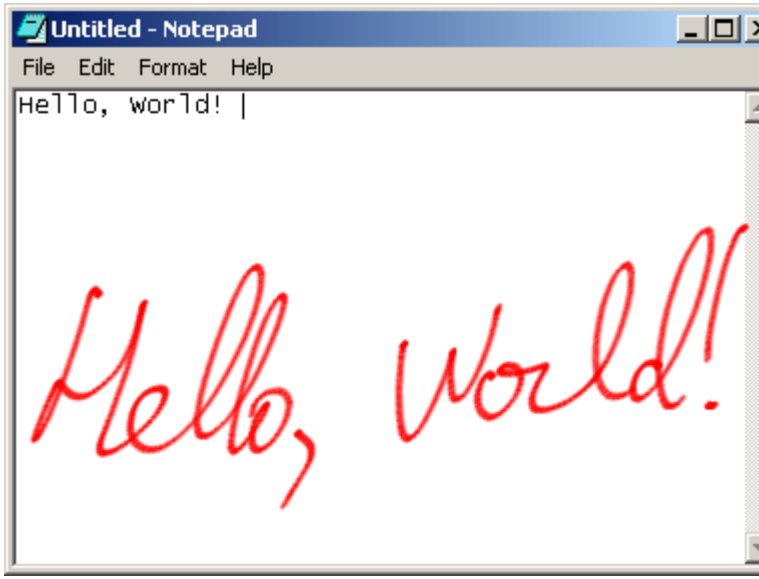

ritePen is an easy-to-use and powerful handwriting recognition application. Write anywhere on the screen or other writing surface and watch your handwriting instantly converted to text and entered into any text-aware application window such as Microsoft Word, Notepad, Excel, Outlook, File Manager, Internet Explorer, etc. It's that simple.

Automate your desktop life and control your workflow "at your fingertips" using ink commands; markup and annotate full screen and take instant notes; perform context aware recognition in forms and other applications, and much more...

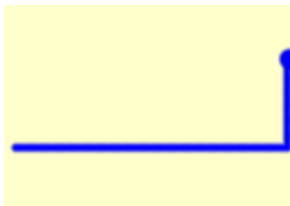

## ritePen at a glance

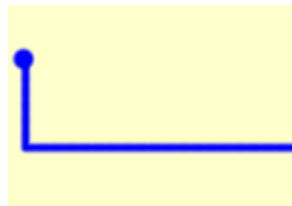

## Entering text and correcting errors
